

Álvaro Cano

RIGGER · TOOL DEVELOPER

Rigger and technical director specialized in modular autorig systems for Maya, written entirely in Python. Design of biped and quadruped character rigs with clean node architecture and PySide2 tools that speed up the team's workflow.

EXPERIENCE

LEAD RIGGER AND TOOL DEVELOPER
LA MONJA GITANA SHORT FILM

- Supervision and organization of the rigging department, and development of a guide-based modular autorig for both bipeds and quadrupeds.
- User-friendly design and development of the UI, with several customization options for the autorig.
- Development of various tools for the short film, such as the color override tool, toggle rotation axis tool and lock and hide attributes tool.

COLLABORATOR RIGGER
STIGMA, ENCORE & MI VECINO ES UN CAPULL* SHORT FILM

- Crowd rigs for the short film Stigma, built with Mgear and custom attributes.
- Drum kit rig for the short film Encore, with deformers for the drums and IK points to make the cymbal animation easier.
- Complete main character rig with body mechanics and facials for Mi vecino es un capull*.

STUDIES

2023 - 2027 - GRADO EN ANIMACIÓN 3D Y VFX
La Salle - Ramón Llull University
